Technical help is available: Monday - Friday from 02:00 AM - 8:00 PM (EST)

Documentation on all Paxton products can be found on our web site - <http://www.paxton-access.com/>

Desktop Reader

The desktop reader is designed to sit next to the PC. It is used for adding tokens to a Net2 system and also for identifying lost cards. Additional workstations can also have desktop readers.

With the Net2 software running, any new token presented above the desktop reader will cause the new user wizard to appear with the appropriate card number displayed. The users details can then be entered and the token issued.

If the token is already known to the system, the relevant user's record will appear.

Installation

Plug the reader into a convenient USB port on the PC with the supplied USB cable.

Stop and then restart the Net2 server program. The device will now be available to the Net2 program.

This unit requires Net2 v3.09 or later software. Call Technical Support if you require a software upgrade.

Specifications

Specifications			
Environment	Min	Max	
Operating temperatures - all items	0 °C (32 °F)	55 °C (131 °F)	
Waterproof			No
Electrical	Min	Max

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
