Current consumption	120mA

### Environment

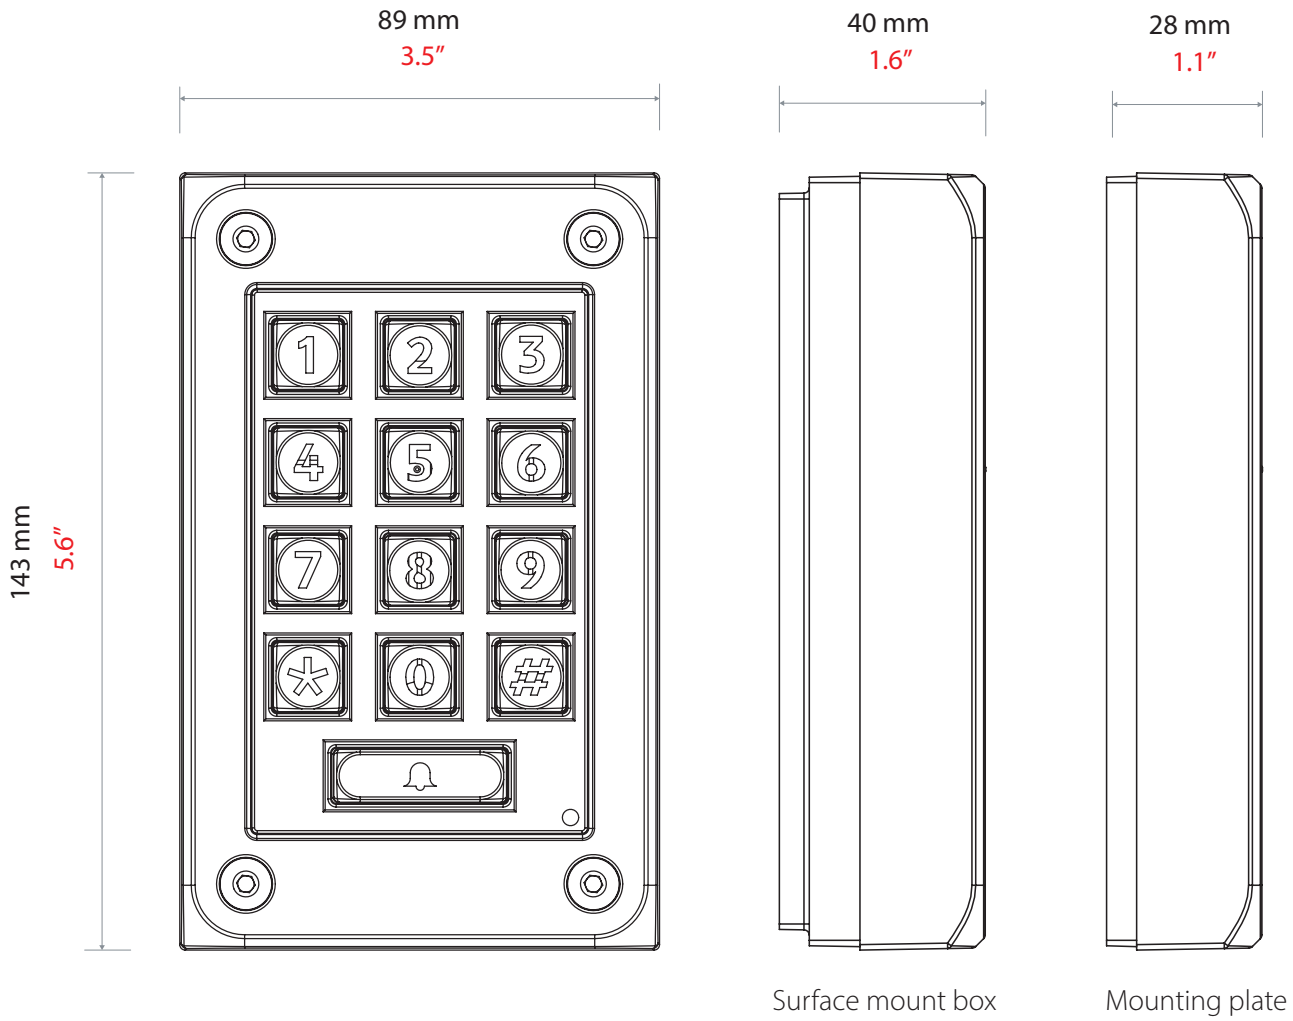

Operating temperature	-20°C - +55°C -4°F - +131°F
Moisture resistance	IPX7
Vandal Resistance	High

The vandal resistant metal keypads are devices that offer the simplicity of PIN or Code authentication for system users.

They are available for use with both Switch2 and Net2 systems. The reader is wired as shown on the control unit label.

By default, all 3 LEDs are lit. If access is granted, the green LED flashes and an audible tone is emitted. Incorrect PIN's will not return an access denied response.
