

Compact Proximity reader - Vandal proof

System specifications

Maximum total users/tokens 100 card packs (up to 5,000 tokens/users)

Door open time 1 sec - 60 secs

Readers per door 1

Exit button input Yes

Silent operation Yes

Data retention during >10 years

EL

a total power loss

Operating Voltage 11V - 14V DC

Current consumption 160mA

12V DC lock output 750mA @ 12V

Environment

Operating temperature $-20^{\circ}\text{C} - +55^{\circ}\text{C} -4^{\circ}\text{F} - +131^{\circ}\text{F}$

Moisture resistance IPX

Vandal Resistance High

The compact vandal proof proximity readers are RFID devices that offer the convenience of contactless authentication for system users.

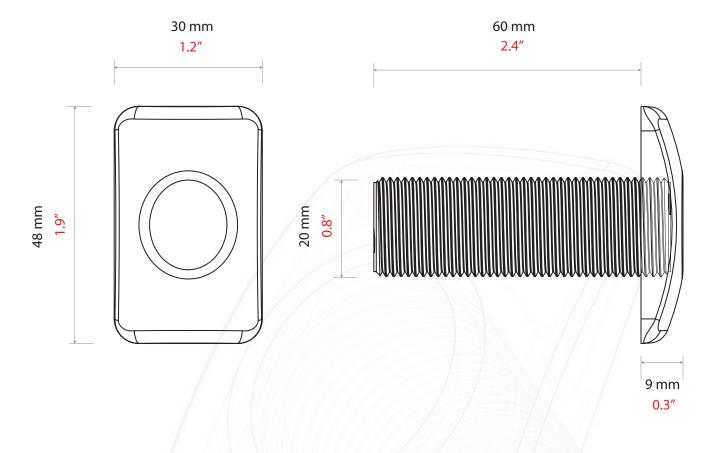

All compacts are standalone, meaning that they do not use a PC in their set up. The Compact products are a control unit and reader in one; they are great for lower security internal and external doors that need to have restricted access.

Note: Be sure to avoid mounting proximity readers on metal surfaces or near other proximity readers as this will affect the read range.

The readers are supplied with a choice of black or white covers/bezels.

A token is read by holding it within close proximity of the reader. If access is granted or denied, an audible tone is emitted
