12V DC lock output	750mA @ 12V

Environment

Operating temperature	-20°C - +55°C -4°F - +131°F
Moisture resistance	IPX7
Vandal Resistance	High

The Vandal resistant compact metal keypad is a single door access control system. The keypad is manufactured using a cast metal housing and is supplied with a choice of a metal mounting plate or a metal surface mounting box. This robust keypad is also backlit for ease of use in low lighting conditions.

All compacts are standalone, meaning that they do not use a PC in their set up. The Compact products are a control unit and reader in one; they are great for lower security internal and external doors that need to have restricted access.

A PIN is entered using the keypad. The reader checks the validity of the PIN and grants or denies access as appropriate.
