

Ordering a PaxLock Pro - Latch

Overview

When ordering a PaxLock Pro - Latch there are a few key factors to be aware of to ensure you get the right PaxLock Pro - Latch and accessories for your installation.

This application note covers the key areas to be aware of before ordering.

Aesthetics

The PaxLock Pro - Latch is available in either black or white, and with a choice of either a Galaxy or Eclipse handle as shown below. (All variants are listed in the sales codes below).

Sales Codes:

900-120BL-US	PaxLock Pro - Latch, Galaxy, black
900-120WT-US	PaxLock Pro - Latch, Galaxy, white
900-130BL-US	PaxLock Pro - Latch, Eclipse, black
900-130WT-US	PaxLock Pro - Latch, Eclipse, white

Tubular Latch

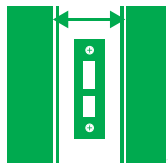

The PaxLock Pro - Latch comes with a tubular latch already in the box. If a different tubular latch is required, it must have a backset $\geq 2 \frac{3}{4}$ " and a rotation of $\leq 45^\circ$.

Door Widths

The PaxLock Pro - Latch is suitable for a variety of common door thicknesses. Depending on the door thickness you may need to purchase one of the wide door kits that are available. Below lists all door thicknesses supported by the PaxLock Pro - Latch and what, if any, door kits you may need to buy to suit your door.

What is the door thickness?

$1 \frac{3}{8}$ " - $1 \frac{49}{64}$ " - This will work out of the box.

$1 \frac{13}{16}$ " - $2 \frac{1}{8}$ " - You will need to purchase 900-059-US - PaxLock Pro - Latch - $1 \frac{31}{32}$ " - $2 \frac{1}{8}$ " door kit.

$2 \frac{11}{64}$ " - $2 \frac{7}{16}$ " - You will need to purchase 900-060-US - PaxLock Pro - Latch - $2 \frac{1}{4}$ " - $2 \frac{7}{16}$ " door kit.

Please refer to the drilling template as cutting of the drive bar or spindles may be required.

PaxLock Pro - Latch: < www.paxton.info/5578 >

Note: When cutting down the spindle or through door bolts you should use a hacksaw with 24-TPI (teeth per inch).

Door Installation Jig

To help you with your installation of the PaxLock Pro - Latch we have created a door installation jig. The jig is designed to help you prepare the door prior to installing the PaxLock Pro - Latch. The adjustable jig can be used to accurately mark out and drill the through door holes.

The door installation jig can be used multiple times and is a great tool to have on hand for large installs.
