

Paxton's Green Policy

Our environmental approach

We aim for a world class approach in all that we do and to us that means always striving for continuous improvement.

We want to build a thriving company that contributes positively to the world we live in, today and for the years to come. Today we have a focused team of Paxton professionals, fully trained on carbon literacy, that are working on our journey to become a net zero company.

Journey to net zero

We are working with Carbon Footprint to measure and benchmark our emissions, ready to create our targeted net zero plan for reduction and off-setting in the years to come.

We will continue to educate our people and our customers on the ethical ways of doing business while developing products that continue to help buildings lower their emissions.

Together, we pledge to conduct Paxton business in a way that not only limits our impact on the environment but enhances it positively wherever possible.

“... While we embark on our net zero plan; to date, we have already

made many environmentally conscious decisions in how we do business...”

Waste & recycling

- We are focused on waste reduction & the education of the Paxton team to ensure we operate in an environmentally conscious way as we go about our work
- Recyclable, sustainable material in **all our promotional items**
- We have established a cardboard and plastic recycling program to **eliminate waste in landfills**

Products, materials & equipment

- Paxton products are built to last - all our products come with an industry leading **5-year guarantee**
- We invest in local sourcing, sea freight and increased stock holding to minimize any reliance on air freight

Customer Communication

- We believe in limiting the need for our printed materials, which are **fully recyclable**
- We invest in and encourage digital communication with Paxton customers & employees like our Paxton Installer app which provides easy access to instructions and product info

Our work space

- As an energy saving process all thermostats are programmed to shut off after business hours
- Keeping paper and plastics out of our café area to limit waste wherever possible

“We have established a cardboard and plastic recycling program to **eliminate waste in landfills**”

“...we know the journey to net zero won't be a quick one, but we are fully committed to reducing our emissions

year on year to reach this target as soon as possible...”
